Samba hangs for hours after restarting

Published 09/09/2013

Symptom(s):

Samba hangs for hours after restarting
Samba log error: "smbd/notify_fam.c:(444) FAM file change notifications not available"

Fact(s):

SGI Origin 3900
IRIX 6.5.28
File Alteration Monitor (fam)
Samba 3.0.20b

SGI Solution:

First, try "killall -HUP inetd". If that doesn't help, try "killall fam".

Change(s):

Windows client was editing file and file was moved on IRIX server.
